The student–industry engagement process begins with the Summer Internship Program, conducted at the end of the first academic year. During the months of April, May and June, students intern with leading organisations for a period of eight to ten weeks. This is an integral component of the curriculum, providing them with first-hand exposure to business practices, industry dynamics and professional work culture.

This engagement continues with organisations from India and abroad visiting IIFT between December and February each year to offer career and job opportunities across diverse sectors, functions and geographies.

Through these initiatives, CRCAD plays a pivotal role in ensuring academia and industry collaboration — enabling students to apply classroom learning to real-world challenges and ensuring recruiters gain access to highly skilled, industry-ready talent.
