Starting from the schedule for their classes to coursework, assignments, feedback, online quizzes, Campus360 has it all. The students can view the schedule for their day's classes online. They can also view the coursework uploaded by faculty which will help them revise the concepts taught even after class. Assignments are uploaded by the faculty on campus360 with a specific deadline. Students get notifications on the Campus360 dashboard regarding their assignments, which they can complete and upload online. Campus360 also helps in conducting online quizzes. Students can attend quiz from their own laptop on specified day and time and for a specified duration. They can view their scores along with correct answers once the quiz is closed for all. This makes the marking process transparent. Research project submission is also done by the students through Campus360. The student dashboard is a very informative feature and helps the students to keep note of the course announcements, assignment deadlines, courseware uploads and quiz schedules at a glance. Industry representatives are also invited to participate in the admission interviews and their feedback is taken during these sessions. Alumni give regular feedback in alumni meetings and sometimes feedback may be sought from alumni on specific issues over email or through personal meetings. The faculty guides/ mentors help the students to structure their approach towards literature review, to identify key findings and research gaps in their area of study. Further during the initial progress seminars, the candidates are expected to update the literature. The Student Mentorship Programme brings students and faculty members together with the goal of helping student, so they will excel academically, become socially responsible, be part of sustainable education, and can navigate many opportunities in future. Under the mentorship programme, each faculty member is allocated a limited number of students. Students can approach the mentor to guide or resolve any issue which a student is facing at that point in time. **7.2 - Best Practices****7.2.1 - Describe at least two institutional best practices**

Practice 1 1. Title of the practice: Complete Academic Management System 2. The Context that required the initiation of the practice: IIFT has been in the forefront in developing Information and Communication Technology (ICT) to support academic management activities of the institute for both the campuses. For this purpose, IIFT has developed a fully integrated in-house platform known as "Campus360" that provides multiple facilities both for faculty, students, programme office, IT and finance for the complete academic management system of the institute. 3. Objectives of the Practice: Campus 360 of IIFT is an extremely efficient, systematic, and sophisticated yet user friendly automated campus of e-learning. Some of the effective features that are provided through Campus 360 are acts as a medium of Student Information System, Faculty Information System, Faculty Deployment, Courseware Repository, Planners Results, Online Quizzes and etc which helps in smooth conduction of the courses at IIFT. 4. The Practice: The system allows continuous internal assessment process, evaluation of courses and conduct of quizzes, cases, assignment submission, class participation, classroom engagements and etc. The student's assignments and case studies with the deadline are uploaded in the Campus360 by the faculty members which the students with a time limit submit then to the faculty online. Quizzes are also conducted online through Campus360. The evaluation of quizzes are also automatically done to support the faculty in terms of comparing performances of the students with no time spent. Faculty upload internal marks on Campus360 as a part of continuous evaluation which allows the students to see their performances any time they require through the same portal. The final dissertation projects are also uploaded through Campus360 and also monitored by the faculty regularly recording their comments for ultimate evaluation of marks. 5. Obstacles faced and strategies adopted to overcome them: The education industry is on edge of a radical change. The need for manpower is increasing with the growth in the Education industry, and a huge demand-supply gap is expected in the education space. To overcome these challenges resulting from such gaps, this industry needs IT solutions to manage its resources with optimal efficiency. In today's world, administration management of organizations, particularly educational institutions, has become a tedious and complex task. It requires careful planning, systematic approach and accurate control of administrative processes to attract the best students, produce best results and project the best image. Coupled with tight competition from the industry, these institutions are increasingly seeking the help of information technology to improve their facilities and maintain a competitive edge to their educational business. 6. Impact of the practice:

The Campus360 also provides mid-term and end-term feedback to the faculty based on their classroom performances evaluated by the students. The feedback helps the faculty to improve their performance. It also provides the facility of online attendance which saves time. The programme office also keeps touch with both faculty and students through Campus360 and regularly upgrade them with class schedules and attendance. Therefore, in a nutshell Campus360 is an in-house unique experiment of IIFT in providing a complete management system efficiently and effectively.
